**CONTROL SYSTEMS.** The effect of actuator position on performance of a CD calender control system: An experimental study on a commercial calender. I. Journeaux, et al. (T17) 1:42.

**CONTROL SYSTEMS '92** emphasized need for managers to get more involved. P.N. Williamson. 11:17.

**CORROSION.** MacMillan Bloedel has own inspection techniques for CTMP refiner discs. C. Reid et al. 4:18.

**CUTTING** edge of smallwood chipping. P.J. Phillips. (T114) 5:37.

**CUTTING** energy bills: There are always new ideas. S.M. Stevenson. 10:10.

**CUTTING** costs. N. McCubbin. 12:183.

## D

**DAISHOWA's** competitors face a moving target. S. Jamieson. 2:13.

**DATA PROCESSING.** Digital instrumentation and control for industrial and utility electrical systems. R. Hart & D.B. Langford. (T368) 12:132.

**DCS** challenges at the ALCELL pre-commercial facility. W. Henry et al. (T379) 12:143.

**DEFORMATION.** Oxbow effect and surface temperature profiles of calender rolls. J. Zwart et al. (T41) 2:30.

**DE-INKED** and secondary fibres: Their effect on cleaning and conditioning of paper machine clothing. J.C. Gagnon et al. (T387) 12:152.

**DE-INKING** is CP Forest's news at Gatineau. S.M. Stevenson. 5:28.

**DE-INKING** of fine papers. M. Lapointe et al. (T316) 11:46.

**DE-INKING.** Kruger's new plant makes recycled pulp with style. S.M. Stevenson. 12:24.

**DIAGNOSIS.** Expert system diagnosis in cd weight control. S. Evans et al. (T153) 6:49.

**DIGITAL INSTRUMENTATION** and control for industrial and utility electrical systems. R. Hart & D.B. Langford. (T368) 12:132.

**DIOXINS** control. An evaluation of the effectiveness of dioxins control strategies on organochlorine effluent discharges from the Canadian bleached chemical pulp industry. C.E. Luthe et al. (T239) 9:40.

**DRIVES.** Availability and energy efficiency are keywords for drive systems. S. M. Stevenson. 4:14.

**DRIVES.** Variable speed ac drive applications for the pulp and paper industry. M.B. Clayton. (T179) 6:78.

**DRIVES.** Why are paper machine drives going ac? T.G. Branch. (T366) 12: 129.

**DRYERS.** Certification of old (pre-1930) cast iron dryers by ASME boiler and pressure vessel code. (T254) 9:57.

## E

**EASTERN** companies rationalize older facilities. J. Bailey. 8:18.

**ECONOMY** slows down spending in central Canada. J. Bailey. 9:11.

**EFFECT** of actuator position on performance of a CD calender control system: An experimental study on a commercial calender. I. Journeaux et al. (T17) 1:42.

**EFFECTS** of jet impingement on Bel Baie machines. D. Johnson. 5:12.

**EFFLUENT TREATMENT.** Le procédé biocarbone comme alternative de traitement secondaire pour l'usine de papier journal Kruger Inc., Bromptonville. L. Aratreda et al. (T64) 3:47.

**EFFLUENT TREATMENT.** Anaerobic/aerobic treatment of NSSC/CTMP effluent and biogas utilization. R. Garvie. (T72) 3:56.

**EFFLUENT TREATMENT.** Secondary effluent treatment with high-rate activated sludge at Howe Sound Pulp and Paper Ltd. A.T. Strang. (T140) 5:65.

**EFFLUENT TREATMENT.** Freeze crystallization of Temcell's BCTMP effluent. R. Kenny et al. (T295) 10:55.

**EFFLUENT TREATMENT.** Aerators at heart of secondary treatment efficiency. 12:22.

**ELECTRICITY.** Keeping current: Towards a safer, more efficient mill. S. Jamieson. 6:12.

**ENERGY.** Innovative system saves money and energy for Cascades mill. Special to P&PC. 6:17.

**ENERGY.** Cutting energy bills: There are always new ideas. S.M. Stevenson. 10:10.

**ENVIRONMENT** and economy take their toll on chemical use. J. Piccione. 1:11.

**ENVIRONMENT.** Chlorinated organic matter in bleached chemical pulp production. J.L. Fraser et al. (T120) 5:43.

**ENVIRONMENTAL** monitoring, what you don't know can hurt you. S. Jamieson. 2:9.

**ENVIRONMENTAL** photolysis of chlorinated organic matter discharged in kraft pulp bleaching effluents. R.J. Caron et al. (T209) 8:24.

**EVALUATION** of the effectiveness of dioxins control strategies on organochlorine effluent discharges from the Canadian bleached chemical pulp industry. C.E. Luthe et al. (T239) 9:40.

**EXFOR '93.** 12:43.

**EXPERIENCES** from the STFI OPTI-Kappa and its use for the control of pulping processes. S.G. Edlund et al. (T356) 12:118.

**EXPERT SYSTEM** diagnosis in cd weight control. S. Evans et al. (T153) 6:49.

**EXTENDED CALENDAR.** Keep track of events: What, where & when. S.M. Stevenson. 11:48.

## F

**FABRICS.** Effects of jet impingement on Bel Baie machines. D. Johnson. 5:12.

FAXES from computers. N. McCubbin. 4:68.  
 FELTS & FABRICS. Surface structure and uniformity of paper machine clothing. (T127) 5:52.  
 FILLERS. A unique kaolin additive for improving the quality of groundwood papers. K. Mueller et al. (T263) 10:21.  
 FINE PAPERS. Challenges in on-line pH measurement and control in fine paper manufacture. L. St. Onge et al. (T361) 12:124.  
 FORMING. Pressing of low solids content webs. I.I. Pikulik et al. (T6) 1:30.  
 FRAGMENTATION of the wood-content publication paper grade structure. R.L. Boehm. (T222) 9:18.  
 FREEZE crystallization of Temcell's BCTMP effluent. R. Kenny et al. (T295) 10:55.  
 FROM THE HOLE to the hill: Automation at Niagara Paper PGW installation. D.N. Freeman. (T325) 12:86.  
 FRP-LOSS-PREVENTION through predictive maintenance engineering. T.N. Bishop. (T166) 6:62.

**G**

GADGET GALLERY. P.N. Williamson. 3:30.

- 17th ANNUAL SURVEY shows world refiner capacity now at 92 000 tonnes. R. Leask. 3:18.
- SILVER outlined PaperWeek clouds. P.N. Williamson. 3:23.
- SIMPLIFIED BLEACHING at the La Tuque mill. R. Vega Canovas et al. (T94) 4:38.
- SIMULATION. Analysis and control of white water network perturbations in an integrated newsprint mill. S. Bussi re et al. (T97) 4:41.
- SLIDES and overheads. N. McCubbin. 5:74.
- SLUDGE. Thermal dewatering: A viable alternative. M.F. Hudson et al. (T218) 8:33.
- SMOOTHNESS. The inter-relationship among air-leak roughness/smoothness methods: A Canadian newsprint study. W. Richard. (T147) 6:43.
- SPREADSHEET software. N. McCubbin. 9:38.
- STATUS of process systems in the search for newsprint uniformity. R.E. Chamberlain et al. (T48) 2:38.
- STICKIES. Understanding the fundamental factors influencing stickies formation and deposition. K. Cathie et al. (T392) 12:157.
- STOCK PREPARATION. For great paper, take care of the pulp. S.M. Stevenson. 2:11.
- STONE-CONSOLIDATED's Pontiac mill has a special niche market. S.N. Stevenson. 11:15.
- SURFACE STRUCTURE and uniformity of paper machine clothing. J.L. Olson et al. (T127) 5:52.
- SURVEY of mechanical pulp bleaching in Canada. T.J. McDonough. (T108) 4:57.

**T**

- TECHNICAL SECTION's 77th year in review. B. Prosser et al. 3:24.
- TEMBEC's Dottori takes over. P.N. Williamson. 5:9.
- THERMAL dewatering: A viable alternative. M.F. Hudson et al. (T218) 8:33.
- TOP PICKS. J. Bailey. 7:10.
- TOXICOLOGY. Compatibility of pulping effluents with the aquatic environment. J.W. Smith et al. (T157) 6:53.
- TRAINING. Newsmill modernization training. M. Mikulasik. (T226) 9:22.
- TS, CPPA shares its knowledge. P.N. Williamson. 12:33.
- TWIN-WIRE gap forming: Leading edge technology for newsprint in the 90s. D.E. Baker et al. (T170) 6:68.
- TWIN hard discs for the price of one? N. McCubbin. 6:88.

**U**

- UNDERSTANDING the fundamental factors influencing stickies formation and deposition. K. Cathie et al. (T392) 12:157.
- UNIQUE kaolin additive for improving the quality of groundwood papers. K. Mueller et al. (T263) 10:21.
- UPGRADING groundwood printing papers: What can soft calendering do? M.V. Tuomisto. (T36) 2:25.
- UPGRADING. Improving disc filter maintenance. M. Priddle. (T199) 7:25.
- USE OF ENZYMES to decrease the Cl<sub>2</sub> requirements in pulp bleaching. J.S. Tolan et al. (T116) 5:39.
- USING FROTAPULPERS in bisulphite mills for resin and dirt count reduction. S.F. Ali et al. (T52) 2:42.

**V**

- VARIABLE SPEED ac drive applications for the pulp and paper industry. M.B. Clayton. (T179) 6:78

**W**

- WOOD QUALITY considerations in wood procurement decision-making. R. Pulkki. (T88) 4:29.
